

Genetic engineering work in genetic engineering facilities – Refresher course

Officially recognized advanced training event in accordance with § 28 GenTSV

Refresher Course Appointed Project Manager Expertise

Officially recognized advanced training
course according to § 28 GenTSV

When : Thursday, 10th October 2024

WHERE: Livestream-Seminar via Zoom

According to the amended Genetic Engineering Safety Ordinance (GenTSV, as of 2019), Appointed Project Managers (PL) and Biosafety Officers (BSO) must renew their expertise every five years by attending a refresher course.

Target group

The refresher course is addressed to biologists, physicians, biochemists and other natural scientists who have already obtained the project leader certificate or are working as BSO and need a refresher training.

Course management and moderation

Dr. Peter Schlegel (Biological Safety, DKFZ)

Referents:

Dr. Timo Kehl (Biological Safety, DKFZ)

Dr. Melanie Tramontano (Biological Safety, DKFZ)

Dr. Katja Schmidt (Microbiolog. Diagnostics, DKFZ)

Agenda

08:00 Start of the event

08:15 Welcome and introduction

08:30 Basics and application of the legal provisions of the genetic engineering law and regulations

Insight into the legislation in Germany. Duties of PLs, operators and BSOs including practical implementation of the same. Updates in the GenTSV.

10:00 Discussion

10:15 Break

10:30 Hazard potentials and risk assessment

Evaluation criteria, classification and hazard potentials of organisms, use of regulatory forms for risk assessments and BSL2 proposals.

12:00 Discussion

12:15 Lunch break

13:15 Safety measures for genetic engineering facilities

Constructional requirements for laboratories and animal housing areas, as well as equipment of the same. Hygiene in the laboratory and transport of biological samples - in-house and external.

14:45 Discussion

15:00 Break

15:15 Organizational measures in the laboratory

Operational instructions, hygiene and emergency plans, good laboratory practice, personal protective equipment, inspections by authorities, instructions, biosafety culture, occupational health regulations

16:45 Discussion

17:00 Final discussion round and clarification of open questions

17:30 End of the event

Organizational measures:Attendance check:

The strict attendance requirement for participants also applies in the livestream seminar. To guarantee this, the following criteria must be met:

- The identity of the participant:s will be verified at the beginning of the event. Please have an identification document ready.
- Participants must have an active camera connection and may not be absent for more than 15 minutes during the entire course day. This will be checked at irregular intervals.
- Participants must log in to the meeting with their full first and last name and be present for the entire course day.
- At the end of the course you will be asked to take a final exam on the Moodle platform. This must be completed within one week. Participation in the course can only be certified after passing the final exam.

Technical requirements

- An Internet-connected end device must be available (computer, tablet, cell phone).
- The device must have speakers, a microphone and a camera.
- We use Zoom Meetings as the platform for the course. The system requirements can be found on the Zoom homepage.

Course fee:

220 € discounted course fee (employees of Helmholtz centers and the University of Heidelberg)

330 € regular course fee

Registration:

<https://indico.dkfz.de/e/refresher-course-project-leader-expertise-oct24>

Supply of the materials:

The materials will be provided digitally as a pdf 2-3 days before the event. The documents as well as instructions for using the online platform can be found on the Moodle teaching platform. You will receive the link to the platform after registering for the course.

Certificate of Attendance:

A certificate of attendance will be sent to the participants by mail at the end of the course. The certificate is recognized according to § 28 GenTSV (2019).
